

TECHNICAL RIDER

VEYLOIRE RISING

Preliminary production requirements

This rider is a practical starting point for a professional, reliable set. It is not a substitute for the signed engagement.

Venue supplies	Professional club-standard media-player and mixer configuration
Audio	Stereo house feed and independently adjustable booth monitoring
Work area	Stable DJ surface and grounded power
Access	Secure change area

Confirmation

Exact equipment, hospitality, travel, set duration, arrival times, and substitutions are confirmed in the signed engagement. The production contact and venue should resolve any compatibility questions before the event date.

Working principle

The objective is a safe, stable, club-standard setup with clear monitoring and a reliable house feed. Equivalent professional equipment may be confirmed in writing when the listed configuration is not available.
